SUMMARY

Full Stack Software Engineer with 2+ years of experience designing, modernizing, and scaling production web applications, REST APIs, and microservices. Proficient in **C#, .NET 10, ASP.NET Core, React 19, TypeScript**, and relational databases (**SQL Server**). Skilled in building modular UI component toolkits, designing Clean Architecture backends with CQRS, and engineering real-time data integrations via SignalR and Azure Service Bus.

EXPERIENCE

Xome

Chennai, TN

Software Development Engineer I

July 2024 – Present

Auction & Offer Services — Microservices

C#, .NET 10, EF Core, Dapper, SQL Server, Redis, Azure

- **Took end-to-end technical ownership** of platform modernization — gathering requirements with product and business stakeholders, unblocking cross-team integrations in 1–2 days, and reviewing PRs for architectural and clean code standards.
- **Restructured core system architecture** by splitting a single service into two independent microservices, redesigning SQL Server schemas, and eliminating data duplication across platforms.
- Modernized legacy APIs into high-throughput **.NET 10 microservices (Clean Architecture, CQRS)** handling **2M+ daily API requests**, replacing stored-procedure logic across **30+ REST controllers**.
- Engineered multi-state workflows (approval/rejection, counter-offer, e-sign, contract execution) leveraging the **SAGA pattern** behind secured APIs with **Role-Based Access Control (RBAC)**.
- Re-architected a legacy 5-minute file-polling job into an event-driven **Azure Service Bus** pipeline (**cutting processing latency by 99%**, from 300s to <1s), upgraded real-time updates to **SignalR**, and built **stranglerfig middleware**.
- **Debugged and resolved production issues** using **Azure Application Insights** telemetry and service logs.

Xome Web & Live Dashboards

React 19, Next.js, TypeScript, TanStack Query, SignalR, SCSS

- Built **10+ web pages** for customer-facing **Xome Web** (including **payment-related flows**, event management, property mapping, and registration) using **React 19**, strict **TypeScript**, and modular **MUI/SCSS** components.
- Managed server state with **TanStack React Query + Zustand**, implemented **debouncing**, and enabled real-time bidirectional updates via **SignalR**, supporting **2,000 peak concurrent users (16K DAU)** while cutting redundant API calls by ~40%.
- Integrated secured REST APIs with **Azure AD B2C (MSAL)** authentication and role-based UI gating.

Software Engineer Intern

Jan. 2024 – Jun. 2024

- Developed and modernized responsive frontend UI components with **React** and **SCSS**, improving cross-device usability.
- Optimized **MongoDB** document schemas and CRUD features to enhance data query performance.

PROJECTS

Riders Management System | Next.js, TypeScript, React, .NET Core, PostgreSQL, Docker

2025

- Shipped an end-to-end multi-tenant operations platform featuring role-based dashboards, real-time rider tracking, and automated financial payout calculations, **cutting manual dispatch time by 40%**.

Codebase Duplication Analyzer | React, Next.js, GitHub API, OpenAI GPT API

2026

- Engineered a full-stack developer productivity tool leveraging the GitHub API and OpenAI GPT to analyze codebase AST structures, detect duplicated components, and generate structured refactoring plans.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Python, Java, SQL, HTML/CSS, SCSS, Dart

Full Stack & Frameworks: .NET 10, ASP.NET Core, EF Core, Dapper, React 19, Next.js, Node.js, TanStack React Query, Zustand, SignalR, MUI, SCSS, Tailwind CSS

Databases, Cloud & AI Tools: SQL Server, PostgreSQL, Redis, MongoDB, Docker, Azure (Service Bus, App Insights, AD B2C), RabbitMQ, GitHub Copilot, Claude Code, Git, Postman, Visual Studio

Concepts: System Design, Distributed Systems, Microservices, SAGA Pattern, Event-Driven Architecture, Full Stack Development, Modular UI Design, Clean Architecture, CQRS, REST APIs, RBAC, Prompt Engineering, CI/CD

EDUCATION

Bannari Amman Institute of Technology

Bachelor of Engineering in Computer Science

Sathyamangalam, TN

Aug. 2020 – May 2024
